ABOUT ME

Experienced Frontend Developer with over 5 years of expertise specializing in the React ecosystem. Proven track record of delivering high-performance UI/UX using modern JavaScript, TypeScript, and UI libraries across industries such as blockchain, travel, and education. Currently freelancing and actively seeking full-time opportunities to contribute to forward-thinking tech teams.

EXPERIENCE

Frontend Developer   *freelance*
                                                            Sep 2024 - Present

- Developed reusable Sanity CMS templates that reduced client onboarding time by 60% and accelerated project delivery
- Architected modular content block system enabling flexible page layouts while maintaining consistent design standards across client websites
- Built self-service component library allowing clients to create and modify pages independently, reducing ongoing development requests by 40%
- Integrated headless CMS solutions with Sanity.io, empowering non-technical users to manage content without developer intervention

Frontend Developer   *Full-TIme*
Globiance Holding Limited   *Jan 2024 - Aug 2024*

- Built full-stack DEX platform from scratch using Uniswap V2 protocol with automated token swapping and 45% performance optimization
- Engineered comprehensive liquidity management system with pool creation, staking rewards, and real-time trading interface using Redux
- Implemented multi-wallet Web3 integration supporting MetaMask, WalletConnect, and Coinbase Wallet with secure transaction signing

Frontend Developer   *Remote*
Pytheas Infosys   *Sep 2019 - Nov 2023*

- Led website builder platform serving 50+ travel agencies across Southeast Asia
- Built modular component library and template system with real-time preview functionality
- Integrated live travel APIs for pricing, availability, and booking with SEO optimization

Web Developer   *Full-Time*
Ed Tech Myanmar   *Oct 2018 - Aug 2019*

- Upgraded education management system from Laravel v4 to v5.6 while maintaining data integrity
